EDUCATION

Iloilo Science and Technology University, *Bachelor of Science in Computer Science* — Iloilo City, Philippines

- *Expected Graduation: 2027*
- *Relevant Coursework: Software Engineering, Database & Information Management, Advanced Programming, Data Structures & Algorithms, Human-Computer Interaction, Data Science*

Colegio de San Jose, *Senior Highschool* — Iloilo City, Philippines

Senior High School Diploma - TVL ICT Strand (Information and Communications Technology) — May 2023

ACADEMIC & TECHNICAL PROJECTS

PrivARcy: Real-Time Redaction of Sensitive Information in Live and Recorded Video Streams, Undergraduate Thesis | *Project Lead*

- Lead a four-member thesis team by coordinating tasks, requirements, timelines, and deliverables.
- Break project work into specific tasks and review outputs for completeness and technical consistency.
- Research technical questions, explain relevant concepts to team members, gather their input, and guide revisions toward agreed solutions.
- Current thesis work includes investigating YOLO26 and OCR-based approaches for sensitive-information detection and redaction.

Personal Journal & Habit Tracker, *Python, Local Database*

- Built a local journal application with CRUD functionality, user-defined habits, and configurable keywords.
- Implemented keyword-based habit detection that updates daily habit completion from journal entries.
- Created a GitHub-inspired yearly progress grid to visualize habit consistency.
- Added database update handling to preserve existing user data when application changes are introduced.

Business Website, *Academic Project | HTML, CSS, JavaScript*

- Selected a real local barbershop as the subject of an academic website project after obtaining permission through direct messaging.
- Developed and customized a website concept based on the business context and presented the completed work to the business through an online link

Turn-Based RPG, *Academic Programming Project | C*

- Developed a text-based turn-based RPG for the command line, expanding an initial combat concept with selectable moves, defense, healing, and boss encounters.
- Iteratively added and refined game mechanics and a text-based interface while using AI assistance during development

LEADERSHIP & INVOLVEMENT

Class Mayor, *BS Computer Science*

- Coordinate class communications, schedules, activities, and responsibilities with students, faculty, and class officers.
- Use task assignment and follow-up to help organize class responsibilities and departmental activities.

HONORS & RECOGNITION

Dean's Lister (5 Semesters), Iloilo Science and Technology University — 2023-2026

Leadership Recognition, Class Mayor, College of Computing and Informatics — May 2026

With Honors, Colegio de San Jose — May 2023

SKILLS AND INTERESTS

Programming: Python, C, Java, JavaScript, Dart, R, SQL
Web & Mobile: HTML/CSS, Bootstrap, Flutter
Databases & Data: MySQL/XAMPP, database management, data preparation, exploratory data analysis
Development & Tools: Git/Version Control, VS Code, PyCharm, NetBeans, Notion, Microsoft Office, Google Workspace, Photoshop
Additional: Software testing & debugging, task/backlog management, requirements documentation
Languages: English, Filipino/Tagalog, Hiligaynon
